**Management comment**

On behalf of the Board of Directors and the management team, Mr. Mazin Manna, ADIB Group CEO, said: “Our 2019 earnings of AED 2.6 billion with a 4% growth marked a steady finish to 2019 in which we increased revenue across our core businesses while maintaining strong expense discipline throughout the organization. At a time when competition in the banking industry has intensified, we were able to grow our revenues reflecting successful business strategies and product propositions. This underlying performance, coupled with progress in our long-term strategic initiatives, helped us generate a significant return on shareholder value of 18.6%.”

“Our growth in revenues has been complemented by our discipline in managing costs which saw the cost to income ratio decrease by almost 1% for the year. We have demonstrated strong expense discipline across the bank and successfully implemented a number of optimization initiatives, resulting in a flat expense base. However, the full financial benefits of these initiatives have been partially offset by investments in new digital and strategic initiatives that can help to attract new customers and support ADIB’s long-term growth.”

“Our retail banking division delivered a solid performance in 2019, supported by a rise in net financing income and growth in fee income, driven by cards and wealth management products. In our wholesale banking business, we continued to build on a strong track record in financing and advisory, supporting clients in capital markets, M&A advisory, syndicated financing, cash management and global trade services. New business deals have led to a healthy growth in our asset book despite the challenging market backdrop. We have strengthened our digital capabilities with the rollout of several new Transaction Banking products and services, such as ADIB Direct and ADIB Office Banking which provides customers with remote access banking solutions.

“Despite a low rate environment, our net profit margin was 4.25%, helped by the positive impact of a low cost of funds that is supported by higher CASA balances. Our liquidity remains strong, with an advances-to-deposits ratio increasing in Q4 19 to 80% reflecting our ability to make optimal use of the balance sheet.”

“The bank has completed the first year of its digital transformation plan launching a number of new services and features in 2019, including adding new features to our mobile banking experience enabling pre-approved customers to receive funds instantly, apply for a card or update KYC instantly from the app. Our enhanced mobile app has driven growth of 20% in our mobile user base compared to last year where over 60% of our customers are now using digital channels. In 2020, we will continue to advance the Bank’s digital credentials, introduce new products and convenient banking solutions that improve the banking experience for all our customers.”

**Outlook**

“Despite challenges in the macroeconomic environment, the prospects for the UAE in 2020 are encouraging as the Government’s stimulus plans and Expo 2020 are expected to boost key economic sectors. ADIB will continue to invest in areas where we see opportunities for customer growth, particularly through a concerted focus on enhancing our digital banking services. We have a five-year strategic plan that will make ADIB a stronger, more efficient, better-structured bank that is well-positioned to pursue growth opportunities across all of our businesses. By adhering to this plan and focusing on delivering an exceptional banking experience to our customers, we are confident that we will continue to deliver the performance our shareholders have come to expect in 2020 and beyond.”
